

UNIVERSAL REMOTE CONTROL

For gate and garage door motor drives

Ref. 104716

COMBINE YOUR MOTOR DRIVES ON THE SAME REMOTE CONTROL

Pair your various motor drives with this Avidsen universal remote control: gates, garages, centralise your controls! Compatible with most brands on the market, by directly copying fixed-code remote controls with a frequency of 433MHz, its pairing requires the original remote control. This universal remote control can manage up to 4 different motors with a range of 50 metres.

PRODUCT BENEFITS

- The remote control copies the radio transmitters of all major motor drive brands (gate motor drives, garage door motor drives) to offer you an aesthetically pleasing, intelligent and reliable alternative solution.
- Compatible with most brands on the market, by directly copying remote controls with a frequency of 433 MHz (the original remote control must be available).
- The same universal remote control can manage up to 4 different brand remote control buttons.

TECHNICAL FEATURES

- 1 x 4-button remote control
- Remote control range: 50 m
- Works with two CR2016 batteries (included)
- Key chain included
