### MONITOR YOUR LOCAL WEATHER

Integrate this Avidsen weather station into your home for real-time information on indoor and outdoor air quality. Its backlit colour screen gives you a clear view of indoor and outdoor temperature and humidity, as well as atmospheric pressure and comfort index. It also has a clock and alarm function, making it a useful and effective everyday accessory!

**WIRELESS - OPEN-AIR RANGE**  
Between the station and the wireless sensor

**ALARM FUNCTION**

LR03 AAA

**BATTERY OPERATED**  
Batteries not included

**MAINS ADAPTER**

**BACKLIT SCREEN**

## PRODUCT BENEFITS

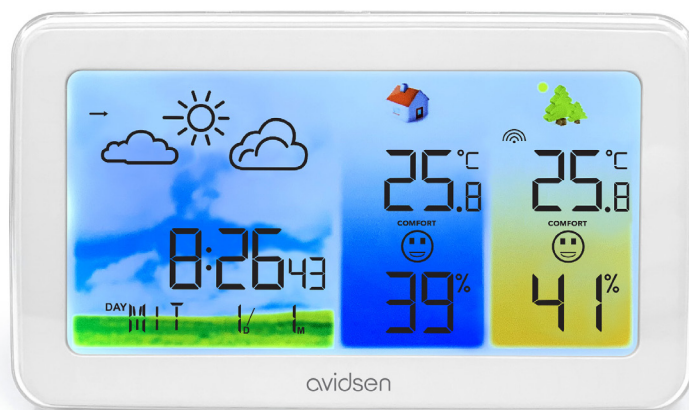

- **Simple, easy** to install: the weather station is easy to install indoors with its tripod, but it can also be wall-mounted. The same applies to the sensor, which can be free-standing or mounted.
- Power supply: the station can run on batteries or be plugged into the mains. The sensor is wireless and battery operated.
- Its backlit colour screen makes the information **perfectly legible**, and you can adjust the brightness to suit your needs.
- The weather pictograms tell you what the weather is like: **sunny, cloudy** or **rainy**.
- You can view the minimum and maximum temperatures and humidity levels that the station has already recorded.

## KEY FEATURES FOR YOUR ROUTINE

For your everyday routine, choose this Avidsen weather station and its features transmitted in real time such as:

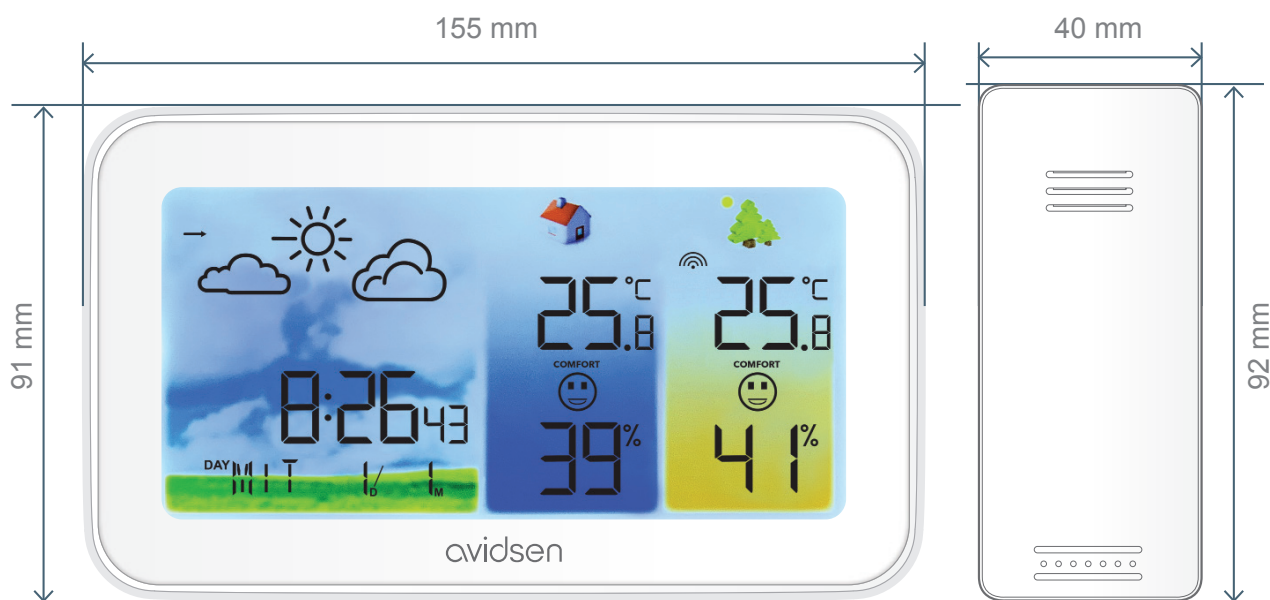

- Indoor and outdoor **temperature** display
- Indoor and outdoor **hygrometry**
- **Atmospheric pressure**
- **Comfort** index
- 12/24 hour **time** display
- **Alarm** feature
