KEEP CONTROL OF YOUR RADIATOR AT ALL TIMES.

Improve your comfort with Aidsen's **HomeFlow TRV** smart thermostatic valve. It can be naturally programmed using the free Aidsen Home app, so you can manage your indoor temperature while saving money at the same time. Make the most of various operating and programming modes to adapt the temperature to your daily routine. You can also easily manage your radiators with Google Home and Alexa.

Economical

PRODUCT BENEFITS

Simple installation

The **HomeFlow TRV thermostatic valve** is compatible with thermostatic taps (a standard tap is not suitable).

- First of all, the diameter of the valve body must be measured. Simply remove the thermostatic head from your radiator and measure the distance between two threads on the screw thread: it should be 1.5 mm (there is no risk of leakage).
- Locate the adaptor corresponding with your valve body among those in the kit.
- Then turn on the thermostatic valve and pair it with the Avidsen Home app.

VARIOUS OPERATING MODES

Mode 1 - Standard operation

- Comfort mode: Optimum comfort temperature all day long.
- Eco mode: The Comfort mode is lowered by a few degrees to save energy while maintaining a pleasant temperature.
- Frost Protection mode: Prevents pipes from freezing when the radiator is not in use.
- Off mode: Radiator valve closed. For use when the heater is not in use.
- Open mode: Radiator valve open. For use when returning from holiday to heat your room quickly.

2 - Weekly programming

- Personalise the heating in your home to suit your schedule using the Avidsen Home app.

Mode 3 - Boost mode

- Heats rooms quickly.

Mode 4 - Holiday mode

- The radiator operates at a minimum temperature, protecting it from freezing during prolonged absences. Programme your absence using the Avidsen Home app.

Other benefits

- Accuracy of 0.5°C for maximum comfort and a stable temperature
- Open window detector
- Child safety
- Product autonomy up to 1 year
- WiFi product: no additional gateway required

KIT CONTENTS

Ref. 127076:

- 1 smart thermostatic valve
- 1 measuring tool
- Mounting rings:

TECHNICAL FEATURES

Power supply	3xAA (not included) - 1-year battery life
Standby current	6µA min
Operating T°	0 - 50°C
Installation	Indoors only
Storage T°	-20 / 70°C
Radio protocol	Wi-Fi 802.11b/g/n (2.4 GHz)
Temperature sensor	NTC, B=3380, R25=10 Kohm +/- 1%
Protection rating	IP20
Max. surface temperature	90°C max (on radiator)
Dimensions and weight	59.4 mm x 99.3 mm x 59.4 mm - 145 g
