SAFELY CHECK IN ON YOUR HOME

Avidsen's easy-to-install and unobtrusive **HomeCam Indoor 4MP** helps you keep your home secure by sending notifications to your smartphone via the **Avidsen Home** app whenever motion is detected. The Internet-connected camera allows you to monitor your home or any other area desired, with ease. Wherever you are, via your iPhone or Android smartphone, you can remotely view video, take a real-time photo or begin recording.

With 2.5K vision and a motorised lens, the HomeCam Indoor 4MP camera lets you cover a wide field of vision to keep your home safe. You get a clear, fluid image in all circumstances.

2.5K

Ultra-high-definition
at your fingertips.

Motion detection Auto-tracking

The motion detection feature
allows you to receive a push
notification in the event of an
intrusion.

Built-in siren

Warns and deters
in the event of
intrusion.

Night vision

The camera is
equipped with infrared
LEDs for night vision.

KEEP AN EYE ON YOUR HOME AND YOUR LOVED ONES

- Your camera offers an ultra high-definition 2.5K image and two-way audio.
- When the camera is in surveillance mode, if motion is detected, a notification is sent to you on the **Avidsen Home** app and your camera tracks the individual responsible for the alert using auto-tracking. A video can be recorded on a microSD card (not included), which you can view remotely at a later stage. You can also activate the built-in siren for a prompt deterrent warning.

- In the **Avidsen Home** app, choose the detection zone and the zone where you do not want to be alerted when motion is detected: draw the desired detection zone to receive an alert for any unexpected motion in this space.

SIT BACK AND RELAX: AVIDSEN HOME TAKES CARE OF EVERYTHING

- The camera is an integral part of the **Avidsen Home** range, which allows you to set real-life scenarios, so you don't have to think about your products.
- If you have **Avidsen HomeLight** bulbs or Avidsen Home shutter controls in your home, you can automatically simulate your presence at dusk or dawn while you are away.
- If you have an **Avidsen Home** alarm or thermostat in your home, it is easy to programme your camera to activate motion detection or private mode based on whether or not you're at home. Then you can sit back and relax, the rest will be taken care of for you!
- Pairing is via **Bluetooth** for quick and easy set-up.

Works with the app
