SAFELY CHECK ON YOUR PROPERTY

Aidsen's **HomeCam WRBAT 4MP** camera is totally autonomous and requires no connection. It runs on solar power thanks to its photovoltaic panel and built-in battery. With its 2.5K vision and 355° motorised horizontal lens, the camera provides optimum surveillance. You can use your app to define the detection zone covered by the camera's motorised lens to monitor and protect the areas of your choice. The Internet-connected camera allows you to easily monitor your home. From your smartphone, via the **Aidsen Home** app, you can view your outdoor areas live and take a photo or video.

Motion and human figure detection

The motion detection feature allows you to receive a push notification in the event of an intrusion.

Night vision

The camera is equipped with infrared LEDs for night vision.

2.5K

High image resolution for clear, fluid vision in all circumstances.

IP44

The camera is designed to withstand and function in all outdoor conditions without any additional protection.

Solar power

Equipped with a solar panel and battery, the camera is quick and easy to install, with no cables to pull. There's no need to charge it either.

Motorised

The motors built into the camera give you remote control over its position (355° horizontal, 55° vertical).

KEEP AN EYE ON YOUR HOME AND YOUR LOVED ONES

- Your camera provides a high-quality 2.5K image and two-way sound (microphone + speaker). When motion is detected while the camera is in surveillance mode, you receive a notification on your smartphone, and your camera records a video on a microSD card (not included). You can then view the recording remotely.
- In the Avidsen Home app, you can choose the detection zone and the zone where you do not wish to be alerted when motion is detected: draw the desired detection zone to receive an alert for any unexpected motion in this space.

NO MORE CABLES

The **HomeCam WRBAT 4MP** camera is designed to withstand harsh outdoor conditions and is equipped with a battery and a solar panel. Its WiFi connectivity and self-sufficiency enable outdoor installation in just minutes, with no need for power cables or a nearby wired network. What's more, you won't need to do any maintenance.

SIT BACK AND RELAX: AVIDSEN HOME TAKES CARE OF EVERYTHING

The camera is an integral part of the **Avidsen Home** range, which allows you to set real-life scenarios, so you don't have to think about your products. you have **Avidsen HomeLight** bulbs or **Avidsen Home** shutter controls in your home, you can automatically simulate your presence at dusk or dawn while you are away. If you have an **Avidsen Home** alarm or thermostat in your home, it is easy to programme your camera to activate motion detection based on whether or not you're at home. Then you can sit back and relax, the rest will be taken care of for you!

In addition, pairing is via Bluetooth for quick and easy set-up.
