

Power+

Rechargeable lithium batteries

By USB-C cable

Multi-purpose

Fast, convenient charging: Combine the benefits of lithium with the flexibility of USB-C!

Save money with **Thomson's** USB-C **Power+** rechargeable batteries. As they are easy to charge and universally compatible, you can power your everyday devices such as remote controls, alarm clocks and electronic toys economically and responsibly.

The two formats, AA (LR06) and AAA (LR03), along with their 4-in-1 multi-USB charger, make them practical for everyday use. **Thomson's** innovative **Power+** rechargeable lithium battery technology guarantees a stable output voltage and high performance throughout their life.

PRODUCT BENEFITS

Long life and versatility

With their capacity of 1,500 charge cycles, **Thomson's Power+** rechargeable batteries allow you to reduce your waste and therefore your environmental impact. The lithium battery is long-lasting, making it a profitable, long-term investment.

Minimum space required!

No need for a bulky charger. The practical 4-in-1 multi-USB cable lets you **charge all 4 batteries at the same time** by plugging it into a standard USB socket. You can also use a conventional smartphone charger, for example (AA and AAA batteries can be plugged into the same charger).

This solution gives you the flexibility to charge when you're on the move: in your car, on your computer, on an external battery, in a conventional charging socket...

MULTI-PURPOSE

With an output voltage of 1.5 V, **Thomson's Power+** rechargeable batteries are compatible with all products requiring AA (LR06) or AAA (LR03) batteries.

Remote control

Doorbell

Electronic toys

Weather station

Bathroom scales

Mini alarm clock

Keyboard, mouse

Medical devices

Console controller
