EFFORTLESS ELECTRIC CONTROL

Extel's 433 MHz remote-controlled socket allows you to control your electrical sockets remotely with ease using the Extel Casa remote control (not included, ref. 701209). Easy to install on a standard indoor socket and discreet, you improve your everyday comfort by controlling your electrical appliances remotely. This solution is ideal for centralising the control of your lights, fans or any other appliances without having to get up.

* Supports up to 2,300 W (resistive load)

** Up to 50 metres in open space

CASA

EASY TO INSTALL

- **Quick and easy installation:** connect your socket to a standard 220-240 V: 50 Hz indoor outlet, pair it easily with your remote control (with a 433.92 MHz signal frequency) and control your electrical devices from the comfort of your sofa!
- **Energy saving:** use electricity only when you need the appliance in question. When switched off, the Extel socket has very low standby power consumption (<1 W).
- **Great compatibility:** handles devices up to 2300 W.
- **Wireless control** up to 50 metres in open space.

IDEAS FOR USE AT HOME...

Ambient lighting

Turn your lights on or off remotely without having to look for the switch.

Hard-to-reach appliances

Practical for a lamp or fan placed behind a piece of furniture.

Energy efficient

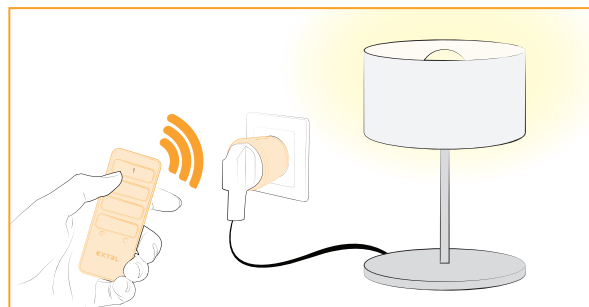

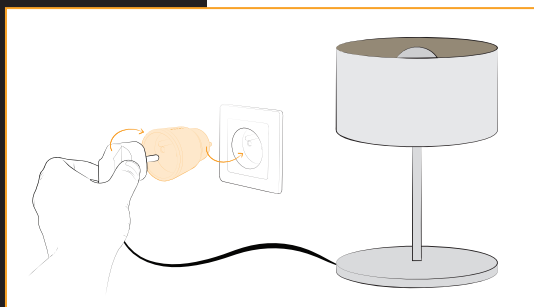

Switch off several devices on standby with a single click before you leave the house.

Evening comfort

Turn off your lights from your sofa or bed.

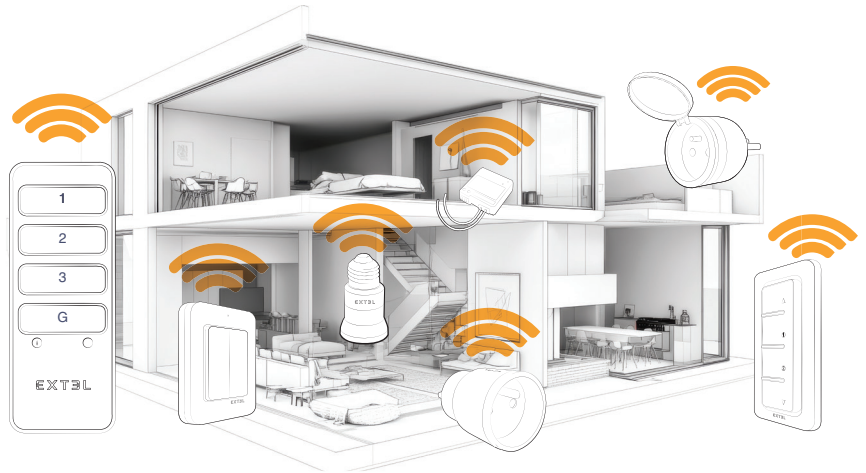

HOW DOES IT WORK?

- Connect the product to a lamp, then plug it into an electrical outlet.
- Within 6 seconds, press the "ON" button on the remote control you wish to pair: the lamp will flash twice to confirm that the remote control is now paired (ref. 701209 not included).

COMPLETE YOUR INSTALLATION WITH THE RANGE **EXT3L** CASA

Simply control your lighting and electrical appliances... from a remote control!
