

EXT3L

Dual wireless switch

433 MHz

CASA

ONE SWITCH, TWO CONTROLS

Upgrade your electrical system without any building work using the Extel Casa wireless switch. Add a control point exactly where you need it, without running any cables, in just a few minutes. With this dual-control switch, you can control several devices from a single location. Pair it with the Extel Casa module and switch your light fixtures on and off with a single press.

** Up to 50 metres in open space

HOTLINE

IDEAS FOR USE AT HOME...

Living room: control the ceiling light or an accent standard lamp, or set up a two-way circuit between the entrance and the sofa without any building work.

Bedroom: control the main lighting or bedside lamps from the headboard.

Stairs: add an extra control point at the top or bottom of the stairs without having to rewire the house.

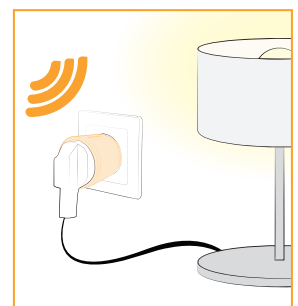

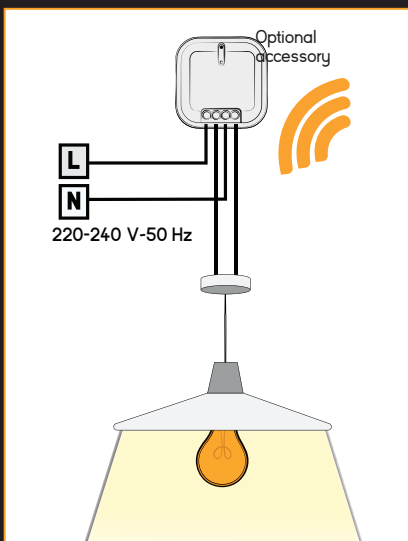

Study/TV nook: switch off an Extel Casa socket to which a screen, set-top box or lamp is connected with a single action.

Spare rooms (garage, utility room, cellar): install a switch in the most convenient location, even if it is some distance from the existing wiring.

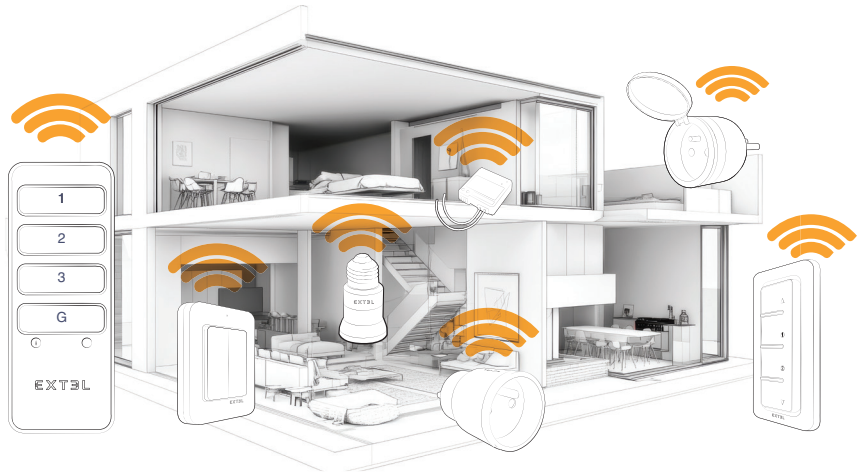

HOW DOES IT WORK?

- Fit the light module (ref. 701203, not included) into the ceiling light behind your light fixture.
- Fit the switch in the desired location using the double-sided tape or screws included in the mounting kit.
- Pair the switch to the light module and/or a remote-controlled socket.

COMPLETE YOUR INSTALLATION WITH THE RANGE **EXT3L** CASA

Simply control your lighting and electrical appliances... from a remote control!
Find out about our full range on our website www.avidsen.com and discover how to make your home easier and more intuitive.
